South River Technologies offers German Language Versions of Products

SRT localizes products to meet demand in German speaking countries

Annapolis, MD USA – October 4, 2006 - South River Technologies announced that it has released German language versions of its popular WebDrive and Titan FTP Server products. WebDrive is a desktop client that connects a Windows drive letter to a server on the Internet. This enables users to store files directly from within the applications that they regularly use and to access files on their servers the same way that they access local files on their PCs. Titan FTP Server is an enterprise class, secure file transfer server for Windows.

South River Technologies does approximately 40% of sales internationally. The largest portion of European sales come from German and French speaking countries. 2006 sales of the English versions of SRT products in German speaking countries increased by about 175% over the same time period in 2005. A French version of WebDrive is planned for later this year.

Meco Systemhaus oHG has been selected as SRT's exclusive distributor of the German versions of WebDrive and Titan. The company has been a reseller of SRT's products for three years. The German language products may also be purchased directly from SRT.

"WebDrive has been well received by the German market", states Dirk Simonis, Managing Director of MECO Systemhaus, "so we are very enthusiastic about the potential for the German version of WebDrive. We are very pleased to be South River Technologies' exclusive distributor of the German versions of WebDrive and Titan."

About South River Technologies

Founded in 1996, South River Technologies (www.SouthRiverTech.com) develops file management software which is used for file collaboration, shared access and website management. SRT's unique client technology, commercially available as WebDrive®, integrates into the Windows environment, creating an instantly familiar interface for the end user, reducing training and support costs. This technology is also licensed to independent software vendors to add functionality to existing product suites. ISPs can also license re-branded versions of our products as an add-on to their service offerings.

About Meco Systemhaus oHG

For over 14 years MECO Systemhouse oHG (www.meco.de) offers competent EDP system solutions. Their focus is in the area of managed Internet services. This includes server hosting for shared web space, managed dedicated and collocated servers. MECO also offers web development services, ranging from conceptualization and implementation, to web database application design and deployment. Many years of network planning and maintenance, combined with solution development supporting internet security demands, provides customers with a partner who listens to the issues of today and responds with solutions for tomorrow.
